Hints will appear here in a few minutes.

For Step 1, only use the 13 guild icons. You need nothing else on the wizard cards.

Think of a wizard's guilds as a set of Venn diagram circles.

Find the number that sits in the intersections.

Step 1: sections

Section 1: math
Section 2: culture
Section 3: currency
Section 4: number properties

Previously

Think of a wizard's guilds as a set of Venn diagram circles. Find the number that sits in the intersections.

Step 1: some of the guilds

 — sides of dice in D&D

 — Apollo missions that *landed* on the moon

 — numbers from the TV show LOST

 — age you can vote but not drink (in the US)

 — reduplicative (i.e. “twin”) numbers

Previously: sections

math / culture / currency / number properties

Step 1: All guilds

Prime • Fibonacci • Square • Factorial • Cube

Sides of D&D dice • Moon landing missions
LOST numbers • Vote but not drink (in the US)

US bills • US coins

Twin numbers • Ordinals that end in “rd”

Step 2: Teams

Start with **Ganesh**, who is the only Conjuror with a full moon.

There are only 4 Alchemists and 6 Mystics who **Ganesh** can be in a set with.

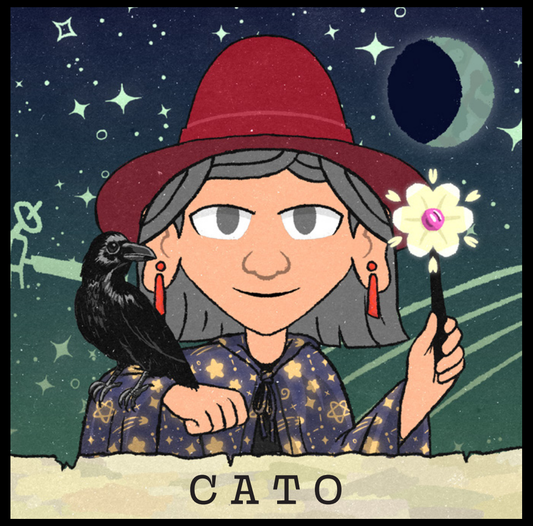

Step 2: Teams

Ganesh, Sonn-Kyu, and **Cato** all share a wand type, but nothing else. You can find the word **TON** in their names.

Step 2: Team Parrot

Hidden word: **TEN**

Step 2: The three cloak teams
